

Q

Are you interested in?

- ➔ Immediate and lasting postural improvements
- ➔ Changing fixed structural patterns
- ➔ A unique manual adjusting technique
- ➔ A highly practical seminar with hands on tuition
- ➔ Continued support from instructors as you implement it into practice

A

ABC™ Basic Seminar

You will learn

- Learn the protocol that detects and corrects everything the body needs help with on a mechanical level
- Learn how to make rapid, lasting and powerful changes to the Nervous System
- Learn how to wow your patient with results they can see and feel
- Learn how to educate you patients on reducing the effects of prolonged sitting and poor sleeping ergonomics
- Learn the research regarding poor posture's effect on health

This program has been assessed by the Chiropractors' Association of Australia (National) Ltd, a body recognized by the Chiropractic Board of Australia, and allocated **12.5 Formal Learning Activity Hours**

Instructors

Dr Richard Martin

Completing his chiropractic degree at RMIT University in 1997, Richard spent his first 9 years in practice utilising a variety of chiropractic techniques. It was in 2006 while working in Glasgow that he first learnt of Advanced BioStructural Correction™. Excited at the prospect after some initial learning in ABC™, Richard travelled to meet founder, Dr Jesse Jutkowitz, in the USA. Richard is credited with pioneering ABC™ in the UK (where it continues to prosper to this day). He was awarded the position of Australasian instructor in 2010 and presents seminars to chiropractors throughout the region on a regular basis. Richard was a founding member of the professional association for ABC™ chiropractors throughout Australasia and serves as its inaugural president.

Dr Samantha Coupe

Samantha studied her bachelor and Masters in Chiropractic at Macquarie University in Sydney. After graduation in 2005 Sam worked for almost 4 years in Scotland which is where she learnt Advanced BioStructural Correction™. It was her time in Scotland that allowed her to try many different styles of chiropractic, however after learning ABC™ she was so impressed with its consistent and predictable results she has devoted years to becoming a Master level certified practitioner. Sam was also one of the first practitioners to be accredited to teach the technique and has coordinated every ABC seminar in Australasia since 2011. She is also a founding board member of Advanced BioStructural Correction Australasia and is very passionate about supporting ABC practitioners.

Dr Ben Coupe

After graduating from Macquarie University in 2005 Ben spent his first years in practice searching for a way to achieve the most consistent and predictable results for his patients. He was exposed to Advanced BioStructural Correction™ and impressed immediately with its logical understanding on the body and its rapid postural and symptomatic improvements. After spending much time study under the technique founder by 2009 he was one of the highest qualified ABC™ practitioners in the world. Ben's passion for ABC™ developed and in 2010 he became one of the first ABC™ instructors. He is also a founding member of Advanced BioStructural Correction Australasia. He now teaches regularly over Australasia and enjoys highlighting the possibilities of ABC™ to his fellow chiropractors.

These photos were taken before and after an Advanced BioStructural Correction™ (ABC™) adjustment. The participants were volunteers who had not been adjusted with ABC™ before. The only other selection criteria was their availability. The instructions for each photo were the same: "breathe in, breathe out, relax and let your body slump". The ABC™ adjustment was the only intervention between the before and after photos and all photographic conditions remained the same. In each photo pair, black lines were added in consistent positions for the purpose of easier comparison.
